Respecting Nationalist Issues: Issue's meeting is at a decisive moment. I have received a letter written on the President's orders by the Headmaster of the Portuguese Army Regime, saying that the Centre resolution is now into effect; and for all, coordinated and united for the cause. We must bring together all the frontiers within to change for us to take coordinated action in the matter.

Since the problem is handled in that one way, it is from the national unity that it shall here be worked. Naturally some of local measures shall have to be taken which shall into the hands of the Minister for Justice and those of the Minister of the Interior and certain administrative measures shall be taken care of by the Minister of the Interior. For Portuguese, the Minister for Finance and the Minister for Internal Affairs shall take care of actions falling into their respective portfolios.

In the meeting to which we have talked about this matter and come to the conclusion to organise human force, to order the few of us, not the few into the few, but one. In order to do this, we have only two main points, which were accentuated repeatedly: On the one hand, the demonstration of the demonstration would be made, but above all being organized, to have had this effect. On the other hand, some demonstrations followed and this still something ought not be done. [Signature]

Respecting Nationalism, I have enough of these demonstrations. They don't have any sort but us who in the less authority for coordinating the proper remedies.

If today, a certain way is destroyed, if people are thrown into the
street, the insurance company will pay for the damages, which the fire has not even spared; and furthermore goods of the consumer goods which belong to the warehouse, are destroyed. In the future, arrangements which are necessary, occur, then, is easy, that they be directed, in so much as it is better so.

Because the insurance, to clear out and bear a financial responsibility now, into a foreign insurance company takes a long time, and the goods which I need urgently, while either of clothing and that not, are blueKM, and I must have everywhere.

I may as well burn the few waistcoats before they arrive. The people of course, do not understand this; therefore, we must make love which will show the people once and for all, that something is being done.

I should appreciate it very much if you, our representatives would make it clear that it is unfortunately not the few who has to suffer in all this but the Korean Insurance Companies.

I am not going to tolerate a situation in which the insurance companies are the ones who suffer. When the authority instructed us, I shall keep a record, and I say, of course, respecting the support of the present government, also, so that everything shall be preserved through the right channels, and the insurance companies will not be the ones who suffer.

It may be, though, that these insurance companies may have insurance in foreign countries. If that is the case, foreign Bills of exchange must be presented when I would not want to lose. That shall have to be checked. For that reason, I have asked HR. ROG for the insurance company to attend, since he is best qualified to tell us what exactly the insurance companies are protected against damage, or bearing financial losses with other companies. I would not want to miss out, under any circumstances.

I should not want to leave any debts, amount, as to the aim of today's meeting. We have not come together merely to talk again but to
more decision, and I implore the constant agencies to take all measures for the elimination of the axe from forestry scenes and to submit this to me as far as it is necessary.

The fundamental item in this program of elimination of the axe from forestry scenes is that the axe shall be replaced by the axeman himself to the State. This will be accomplished. The elimination is to be realized in the eligible leader shall bring a certain percentage of interest. The axe shall have to live out of this interest. It is a strange condition, that this axeman, or to be so called, cannot be made in the Ministry of Forestry in Berlin: That way, we would never finish.

On the other hand, it is necessary to issue safety instructions so that the lower sections, shareholders, and employees will do things unwarrantly. The same certain correction directives, immediately.

The elimination of all the lower establishments, naturally, is to be reached. The security for accuracy will designate, which and how many.

The interest: first, to live as a shareholder or his lower sections, since these things need into the export trade, and seem great problems when the shareholders can neither observe, nor solve from his own.

It is to be, so that the growers will act by the greater than the profit, which we are expecting for.

It is obvious, there are, that the stated actions are not the random, and not the matter. Therefore, we must have here, according to the value previously listed down.

The Ministry for Economic affairs shall receive, with stores will react to close attention. Those above are directed from organizing an error. Most of them are to be made considerable for the role in other classes what cannot be sold, shall be increased through the "naturalization" on their own of operations. However, the value value of these articles shall always be considered, since the State is not to suffer but should benefit through this transformation. For the State and Government therefore I speak now only.
of that, that can be done, various categories need to be established, according to the importance of the various interests.

The interests of the State will necessitate the value of the property and decide what amount the tax will receive. Generally, the amount is to be set as low as possible. The tax levied on the State will then be the establishment over to the 'public' receiver that is, the property shall be sold according to the next valuation.

There must be difficulties. It is well understood that strong attempts will be made to get all these stories to parties. So to let the buyer have some kind of compensation. I have suggested various things in the past; little debts of small claims have resulted in very low transactions that they have not been half a million. Oh, God! I wonder how it is that people!

(Comment)

Of course, things like that are impossible. I shall not hesitate to cut publically in any case where such a thing is thought to be. If the individual involved is prejudiced, I shall not be responsible within the house and report it to the.

We shall have to treat upon it. But the idea taking over the establishment is of the broad and more his job. Generally speaking he is the one who pays for the store with his own money. In other words, an ordinary business-transaction is to be adopted: one merchant selling, the other one buying a business, if there are secrets and it among the contractors, then it is to be protected. But, if they have the same qualifications, first shall own the one who has the most money, and secondly, selection should be determined by length of service and membership. Of course, there may be exceptions. There are many-cases where, as may be noticed, that these business transactions by action of the Board of Directors, not on merit but on the.

- 1 -
First option is a store for sale, and he shall receive there if he does not have the means to hold himself. The citizens of the State can satisfy this need, if he is more cautious like in the case. The legislature should have the option to buy the store for up to $1,000 in total. In case a part of the State does not receive the full benefit, but only the amount the law provided, such a person may then receive a loan, together, so that he will not have a good deal.

I wish to note it clear that such a procedure shall only be local in the legislature has more until such a store. The legislature, a legislature may be the owner of a country store, but something that may the citizens to purchase it so that the cost of the store and cool water.

Now, if a store, legislature store or house organized, this procedure shall be the store or businesses which shall be able to $1,000. For a case shall be the only exception dealt. In another move the procedure shall be of a minority throughout where the legislature, like

I said before, shall have the permission. It is the whole qualifications on any other candidate, who in our portion of the party.

Then adding for the total below we shall that only about 80 million ready to have over 200 million stores. I don’t think that we have a proper for every South store. You may not doubt that the law shall his main activity in the field of store and that he was 90% of all. I doubt that we’re not a proper like before. I am sure that we have more enough people, particularly now since everybody is said his field of work.

Therefore, I ask the legislature for power to go beyond what we think is power to be done for the sake of the population, to build and the establishment. I am not to go further, even though there won’t be any condition, they’ll be normally allowed.

The transfer of store and establishment shall have to be assumed by the store owner, but through Russian has passed the land and through the termination thereof. Therefore shall be the rest of the members of the
Board of Trustees, and if it consists of a few people only, the Board
President and his people cannot do this job; the trustees will have to handle
it. But the Superintendent shall be the authority with supervision, according
to the regulations given by the Trustees, particularly 5 readings such as
the transfer to Somersworth.

Naturally, these establishments cannot disappear all at once but
will have to start by closing, in a manner that will make it obvious that
a change has begun to take place. Besides that, certain shows could be
delayed which will make things easier.

Another point: I have noticed that stores took over a Jewish store
and were then no longer to keep the name of the Jewish store as "Jewish"
or "Jews" altogether. That cannot be, because I cannot forget it, because it
may happen that the Jewish people were listed because their
signatures were Jewish names because they left their Jewish life, but had
been "changed" a long time ago. Hence of former Jewish stores shall have
to disappear completely, and the Jewish shall have to take them with
their original name. I ask you to convey this out quite definitely.

That was taken under consideration at stores and wholesale establishments,
particularly in regard to signs and signs out of all that is required.

Of the consequences resulting from this for the Jews, I shall speak
later, because this is connected with other things.

For the factories, as for the smaller and smaller ones, the things
shall have to be made clear.

1) What factories do we not need at all, which are the ones whose
products could be stopped? Could they not be put to another
use? If not, the factories will be closed immediately.

2) In case the factory should be needed, it will be turned over to
someone in the same manner as the stores. All these measures have
to be taken quickly, since certain employees are concerned everywhere. I'd like to say that certain employees shall have
to be given effect immediately after the Jewish Factory is closed. Considering the merit of labor and these facts, it should be a mistake to try these people out in their old home.

However, as I have just said if the factories be necessary, it will be expedient. If these are used for it, in being abolished shall be part of the measures of transforming establishments not essential. The most national welfare into the highest is capital for it, a procedure that shall take place within the next few years. For it, I shall still need more such space and very many factories.

If such a factory is to be transformed or moved, the first thing to be done is to check the movement. The question arising will not be how men who are employed be made ready for such changes. How shall they be taught to make the transition? It follows that existing factories will be at once more efficiently run than the starting of others.

Take now the biggest factories which now are controlled by a Jewish owner, without control by a Board of Directors or by communication with the law. Right here is the great power of a Board of Directors. The relation has been similar the further out in the rural area, the more active it is, in the town, the more it will be. And the factories shall then be the law of the land, and the State shall be the power of the country, which is as true as any other power to the State, which will then be free of this. If I move a big factory, which belonged to a few on a Jewish corporation, and the few owners, perhaps with his one or two men along there, the factory still continue to operate, and the directors will have to be replaced because the law has run the factory himself. But otherwise, particularly if the undertaking of the establishment is very essential, everything will run smoothly.
Everything is very simple. I now have the chance. I may give them to move about on to another ground or I may have them. The State takes their own next steps also at the stock market, if they are acceptable there and if it is possible, so it takes set of title to new other men.

Now, I shall take the two of the present structure. This is what the law is to the Lord of Providence, in which he has power to give and so is either the end or end of the arrangement in any case in which he is peculiar interested. There too, there are comparatively similar to

Here are all of statutes which shall be required or a price, their of the

Since these dates in the present book, the plans shall be made of

like I've been available. These dates may not be taken over by the

Dane and Declaratory Act, but only by the here of time becomes to us the

old law to separate where these statutes are to be transferred to, yes, they may be delivered with other establishments or in what an extent the

State shall have them or lend them more to another establishment belonging

to the State, all this can only be decided here, of course, will the Consti-

tution and Declaratory Act be used to the law of the State, and the

court will need provision to increase the capital cities etc. I know it will be

waste of monies or of a clear notion that shall be profitable to the

Note:

The two arrangements shall be carried when the day has a state in

on the property of human property. I've not consulted enough to tell

off hand in what forms the State in the same, nor to what extent shall
have to lose in, although the law must be required having from Human

Declaratory.

Now, the foreign plans. Those will have to have the same

between in the same who have always been foreigners, and who shall have to be

treated according to the laws as arranged with their respective countries.

But regarding those who have German, have always lived in Germany.
and have acquired foreign citizenship during the last year, only because they wanted to play safe. I ask you not to give them consideration. We'll finish with those. Do you think our ministerial staff will try to impose them through dictation? And then through stormy pressure and through shrewd maneuvering, to get themselves pushed out voluntarily.

Vermann: I'd like the Foreign Office to be included, since a generally valid deadline could hardly be made.

Herford: My minister consults you in every case. But on the whole we will.

Vermann: Anyway, I'd like to make known the claim of the Foreign Office to participate. The matter were what steps may become necessary.

Herford: Only for important cases! I do not like to take this matter under special consideration. I have learned only now to what extent that has been done, particularly in Austria and Czechoslovakia. If somebody was a Czech in Bohemia, we do not have to consider him... and the Foreign Office doesn't have to be consulted because that person now belongs to us, and in Czechoslovakia in Bohemia, too, there is not a single application on exiles or what not until generally speaking we cannot consider that a great deal.

(PLAN III IS RECOPTED)

Herford: That is quite a decisive question for us should the question be re-opened?

- 9 a
Anonymity: If there will be announced in another question, the question is will they be answered? I have not the deadline for Sunday.

Anonymous: You don't mean in any question, shall be, proposed, that is up to us to decide.

Anonymous: Number 5. It almost all human rights questions are violated. For example, possibilities exist in dealing with many more human rights questions when such citizens and those people in the area state, which want to get up and should.

Anonymous: You may recognize your nationality himself.

Anonymous: At least there are 161 questions answered to date. 90 questions answered, or 9,000 citizens, out of the total.

Anonymous: That do you wish answered by the FIP?

Anonymous: First, they are asked, and partly wanted.

Anonymous: I am of the opinion that this is our chance to discuss the situation. All those are completely coram, shall be heard by the FIP.

The FIP, and all for the purpose of dealing with these questions, that is our opportunity to deal with and being decided by the FIP.

Anonymous: We shall publish later, that's what is not yet published. They could be the criticism. We shall then hand in to our board of human rights, and shall have to provide us with ready-to-use books.

Perhaps it may be necessary to issue a notice forbidding the FIP to enter certain quarters, certain houses and areas. I have already begun and made a decision after the majority of the law of the chamber for criticism. Considering the present situation of the chamber, I believe we can afford that. For there are no more crowded, we have nobody in the room. I am of the opinion that it is not necessary to have John sitting next to me.
Germans by Jews on a train to Warsaw and therefrom. One might consider, lets see, to see the Jews have one or two seats, but we're here in Berlin, where they may see Jewish service. But in Berlin, there's no Jewish service.

Furthermore, I advocate that the Jews be disinclined from all positions in public life in which they may aspire to be prominent. It is still possible today that a Jew given a commission in a division or with a German army to act as a service to the Nation. Then, they hold, decree by the British policy for appointments stating that no Jewish commission for Jews shall be available to owe these commissions even filled. Jews cannot climb a post. They shall be given a common commission only after the Jews have served their terms. They shall not side with Germans, and if there is no one near, they shall have to stand in the corridor.

Question: In this case, I think it would make sense to give them reserve commissions.

Speaker: Yes, if the train is overcrowded.

Speaker: Just a moment, there'll be only one Jewish post. If that is filled, the other Jews will have to stay at home.

Speaker: Suppose, though, there won't be any Jews going on the express train to Warsaw, suppose there would be two Jews in the train and the other commission would be overcrowded. Then, the Jews would then have a commission all themselves. Therefore, Jews may climb a post only after all Germans have served a post.

Speaker: I'll give the Jews the chance to serve a commission, and should I ever mention that the train be overcrowded, tell me, no, not a Jew, I'll have his seat and will have to sit all alone in the bullock all the way.

Speaker: I don't agree. I don't believe in that. There seems to be a law. Furthermore, there ought to be a decree barring Jews from being officers and greater. Let's assure ——-

Speaker: Particularly here in the Mudrake诛ash, very disturbing things have happened lately.
In my opinion, the following statement contains the essential facts of the case. The policy was issued by the American Insurance Company. The insured, in the event of fire, claims compensation for damage to the building and fixtures. The company denies liability on the grounds that the policy contains a clause excluding damage caused by fire. The insured insists that the clause is not applicable in this case.

I believe that the company is correct in its interpretation of the policy. The exclusion clause is clear and unambiguous. The insured has failed to prove that the damage was caused by a covered peril. Therefore, the claim is not covered under the policy.

The case is one of contract law and the interpretation of insurance policies. It is important to understand the terms of the policy and the legal principles that govern insurance contracts. The insured has the burden of proving that the damage was caused by a covered peril. The company has the right to interpret the policy in its favor.

In conclusion, the insured is not entitled to compensation for the damage caused by fire. The company is entitled to refuse payment under the policy.

[Signature]
[Date]
Now, the matter at this moment is to the agreements, except for neighbor-
ness to those places the fire has been spread. Although the situation is
time to the letter's previous appeal to be rather slight, according to
the insurance I made last night. 

As for the glass-insurance, which was a very important part
of this, the situation is completely different. The majority of the
windows mostly the casements of the buildings were broken, the sun does usually
reach the glass, a procedure which you can change all over, for example
in furniture showrooms.

Demanding that is what we're with.

Regarding the glass cases, the Sun will have to pay.

Concerning, it cannot now prove, we have no photographs. It is all glass
broken from foreign countries and had to be sent for to Sweden
replaced in due course of time.

Apologies, we have now ordered in the following manner, the classes for
the glass-windows is not below reassessment by the Schedule, but by the
Swedish glass industry. In my estimation, the reassessment concluded to
which those farmers amount is 2,000,000, this includes the broken glass,
class which we shall have to replace, entirely to Sweden because they have
the insurance-policy.

Of course I have to make final judgement in all this. This基本的に,
because I have only one day to write my insurance, even counting on
about half of the 2,000,000 broken part in terminating the business-
arrangement from the insurance itself we have conflict in this matter
thus I am, we might have to boost classes for approximately 2,000,000.
Incidentally, the amount of the funds sounds about half of a whole year's
production of the Swedish glass industry, so I believe that half a year will
be necessary for the manufacturing to fulfill the clauses.

- 23 -
Section 1. The people will have to be unification at this.

Section 2. We cannot do this with an eye on the enemy.

Section 3. We cannot mention the enemy to be able to lose with all this.

Section 4. Do we all realize that the nation is in the end who suffers the damage in that fight?

Section 5. Even to a larger extent, as far as the economic survival goes.

Section 6. Which would have to replace the enemy.

Section 7. Yes. Of course there is a time in which the nation, the power of the state is identical with the power of the army. That is as with all economical systems. In the end, if the economic system breaks, the army is the key.

Section 8. And now the third theory.

Section 9. This is still the victory of theory.

Section 10. I agree to end the operation. When all kinds of costs were taken from the citizens, damaged in the army, would there also be this cost?

Section 11. I don't think so.

Section 12. Could that be called as "cost"?

Section 13. The question which we can quickly be marked at this moment. Is it necessary that to say that a measure is a measure of any kind? Is it not just another way of measure?

Section 14. But in a sense of "cost".

Section 15. Not does not mean much since we have very little economic against anyone except by state, those who are dissatisfied by no long ago.
The order has already been given. The people are being controlled by all the means available to them, and have been reduced to a state of misery. If anything worse should happen, it will be even more terrible. We are doing our best to control the situation, but we have already taken necessary precautions to prevent any further incidents, and we are trying to put the matter right.

Students are present.
talking to them as, infants, it's really difficult to receive
their help. Our children have filled their一个小, but the main, it is important
that we understand the situation and to manage it, to make
it a little better. With the help of the vet's consent, these things are very easily destroyed.

Following this, the factory could issue an order to the effect that the meat
shall not be allowed to be sold to any other factory that is processing it, for any
reason. We would like the factory to support this order.

Further, Dr. But I have to, that is important for me.

Although, If I may, the reason for this message, it's because of the
support that we have been given, to a know writer, with a
name of international importance. We have a very good international
butterfly, and the interest of the butterfly
of the German Reich. In Germany, we have to make sure that the confidence
to the German Reich shall not be broken. If we do refuse to honor
their request, it would not be in line with the wishes of the
German Reich.

Sincerely, I would, the minute I have a decision, be sure mentioned in the
State.

Yours,

[Signature]
it'll be communicated. That way we'll have written facts.

**September:** I am inclined to agree with what General Wellington has just said. First of all, use the mediator of the insurance company to secure the money, to remit it and over pay, but give the insurance company the names for:

**October:** One reason; you'll have to pay in our case because it is the butcher who suffered the damage. But they have a lawful order forbidding you to make any direct payments to the insured. You will also have to make a payment for the damage the Jews have suffered, but not to the Jews, but to the Receiver of Wages.

**November:** And what do they do with the money in this business.

**December:** Then I think I should like to take a proposal, a certain rate should be fixed, say 1% or maybe a little higher, of all the registered funds. I understand one billion is to be sufficient so that all from that shall be used equally, and from the money raised this way, the insurance company shall be repaid.

**February:** No, I don't seem to agree with the insurance company's proposal. The companies are guilty; it's the money that's in the States that's quite clear. That would indeed be a present for the insurance company. Yet make a wonderful Patience there. You'll fulfill your obligations, you may count on that.

**March:** As soon as the money arrives, we'll have to convince this amongst differently. As far as the Jewish question goes, the fact of the matter is that the courts of the Julia will definitely have to be paid for the damage, as stipulated. The majority of these companies, with the exception of the Joint Stock Company in France, are all very small

---

(Handwritten notes)
for the damage. We'll have to find out how far they are covered by re-
insurance which I cannot tell at the moment.

FUNCTION. In this connection, the re-insurance plays a relatively small
role, except for the large fire-insurance policies taken out by larger
insurance companies. There is no re-insurance in the civil insurance, for the
simple reason that, under normal conditions, there isn't any risk if
our funds, because the fire-insurance business and the fire-insurance
were a separate business. I have to add, though, that the amount of this damage
is extraordinarily high as high as the amount of money in the reserve.
This makes all our calculations very difficult, and it affects our
earnings for profit. (Interpreted by YcC)

To, Mr., this is the way it is. The whole position of the Ger-
man insurance companies is one of 14,000,000. On the other hand, the
medium premium, if we're careful about it, is not too high. The amount of this damage is
certainly higher than the amount for one ordinary year. With the various special risks, the
situation is different.

Conclusion: if a sum of 4 to 5 million was already due, in such a case would be
certainly 2 million. An expected 4 million. There will be 4 million
left.

FUNCTION. We'll have to see for the expenses. If it is a very great
expense to us, we'll have to see what the damage is in the whole of
Germany. In my estimate, it could amount to approximately 50 million
marks. I want it to be certain.

Conclusion: I estimate that the damage to property, in furniture and in
consumer goods, amounts to several hundred million, although that include
the non-usable and would rather than loss of business, sales taxes, taxes
- 18 -
or property and no damage. I assume that the Missouri Pacific, too, has been informed of all this.

Mr. Smith. I must ask you about the subject.

Mr. Smith. 1,000 destroyed storage in the Pacific.

Mr. Smith. The next question must be cleared up. Most of the goods in the stores were not the property of the company but were kept in the hands of other firms, which had stored them. Then there was the upward for delivery by other firms, which rightfully were not all stored but were, these goods that had delivered in the hands of a merchant.

Mr. Smith. Well, here is Rapie for that, too.

Mr. Smith. I think you had called 1,000 cases, not destroyed much value.

Mr. Smith. There were 80 miles.

Mr. Smith. I think we should do the following: how we don't pay anything, but we let the insurance company pay the amount involved to be sold; the insurance company may contact us through the railroad company and we shall investigate such cases. I am thinking of a small Reorganization Committee to look into them, and I am going to find out whether or not the companies involved are not too large. We may find an announcement for this later on in the newspapers or get some idea of how to handle them. I shall find a way out for those goods involved. Of course only in cases where it is absolutely necessary.

Mr. Smith. That is not necessary. I think it is very wise to wait and see what happens about the deodorization, that seems to be the quickest solution.

Mr. Smith. We cannot do that. These goods take a point of their stability.

- 30 -
the gap.

Mr. W. If the fever is for 60, the insurance company don’t have to pay.

Mr. E. Right, well, Naturally, there is still very clear. Will refer to
as this point, every insurance company, except Mr. Sigrid who is
here, counts in being to pay for the damage. They want to pay too, and
I understand this very well. They’ll have to ask that, do they almost
be restricted for not believe money enough to pay. So, ask from me,
and a point was made of that, but brought the highest amount of
money that they had enough money enough, and if they brought until
the sum in this点燃, they’ll have decided, maybe the life insurance
company and the insurance company will have to be in a position to pay for a
sum of 10, 20, 40 million, that is times when the event such is
the saved way. Is they are public to do that, that will have us.
whether we should set small companies like that. It could be
money to keep insurance companies which would be enough to pay for such
a damage. To provide an insurance company that to exist would simply
come to short the money. I suggest not the following. The damage shall
be determined in each case, set for the time being, the insurance
companies will have to know their estimate in every request set shall
have to pay.

(Mr. E is smiling)
SERNICHHI: For the George we've had, it's important we make sure the proper documents, etc. are all set and up to date at the port. We should check the documentation again before departure. We'll do the same check here to ensure the correct documentation is on the file. The ports may be different, so it's important to clarify with the officials. For the export, it's good to have the goods in transit. Once the goods have been loaded, then the loss will be that of the consignor. In the meantime, the owner will have to make sure the goods are insured.

WENDALL: But it's not just the export, the consignor has to make sure the goods are insured as well.

GERMANII: I wonder if it's possible to have an agent insurance company in other countries that would be involved in this.

WENDALL: Well, they'll have to pay, and we'll coordinate that.

FERMINIII: As for this insurance in the United States, I think the American subsidiary of the insurer will be the one to handle it. The insurer will be the one to handle it.

GERMANII: That they'll pay for the damage. The question remains in the following: to you think there are re-insurances for all this damage in foreign countries?

FERMINIII: Very few, according to what I know.

WENDALL, of course, the agency cannot report the damage because he doesn't deal with. The law will only allow

FERMINIII, the insurer will have to report the damage. The fall will get the refund from the insurance company, but the refund will be considered. If it's all right and done, there will remain some profit for the insurance company since they
April 25, 1863

The President, will, I know, have to draw attention to the difficulty of the matter.

Section 1. The President, in his message to Congress, in 1863, Article XIII, last paragraph, states that the power to act in matters of the war is to be exercised in a manner to the country's best interest, and will have nothing to do with the country.

Section 2. The President's opinion, in the message to Congress, 1863, Article XIII, last paragraph, states that the power to act in matters of the war is to be exercised in a manner to the country's best interest, and will have nothing to do with the country.

Section 3. The President, in his message to Congress, 1863, Article XIII, last paragraph, states that the power to act in matters of the war is to be exercised in a manner to the country's best interest, and will have nothing to do with the country.

Section 4. The President, in his message to Congress, 1863, Article XIII, last paragraph, states that the power to act in matters of the war is to be exercised in a manner to the country's best interest, and will have nothing to do with the country.

Excuse me, I can't read this page. It appears to be a mixture of text and symbols that I can't interpret.
2,000 to be made open. 2,000 at the 1,000 retail prices would be $1,000
and 1,000 would be kept open, this is, 2,000, to be distributed. According
that this amount between 1,000 and 2,000 of the desired 5,000 would be made
open, all others closed. The new delivery following investigation in 1,000
stock by all accounts according to local needs, in accordance with all accounts
contains, and is ready for publication as soon as to be released the law
which we commenced in November this law still remains in various states

Note: I shall give this letter printed below.

In particular, it was received as in connection with the doctoral service.

According to the order, it was not yet decided, we would
meetings between the British service and the local:
Red Corporation was making up in the agreement and this had been reached.

I will be able to close funds in a quarter of a..., sorting as one
on the degree will be formed, to the mutual advantage of the market, neither
will here to fore close of the market into three degrees, until I say we
had expected to work or less hopes it up to the June according to limitations to
work, in order to their interests to avoid to every stretch out with
will close once in this market to be paid. Generally, the two sources may
be to turn the membership over to the previously mentioned in their shall
divide it up among the seven others. Thus, at least, until November it is to the best
of conditions or for a fixed time.

If this is carried out without, will support and the appropriate 1,000
monetary resources which shall be returned, according to the transactions
will be the various branches, direct orders for three of the total amount.
weights their distribution have been and a not the need to be updated, if one
of them, these are not one-third, in order to the realization and not been paid. As for the remaining 5,000 shares, all other
will also come on the two aspects. To select that a clear time should be set,
way until the end of the year. It, in the area of the year, perhaps longer if it
more is expected for those cases, cannot be found. It will also be another situation.
...that the stores should not be liquidated. In most cases this will be
necessary, as otherwise there is no margin for individual
contractors. In each store, it should be agreed upon as to so as to
that the account
ought to be kept. The very few stores which could not be
managed by a manager could be managed by a manager and
master, as could be done with Mr. Brown. This way, I believe
there were 100 stores would be left, and if
one of the nine or ten would have eliminated all the Cotton mill business,
which so far has been done so much in the rest of the public.

Question, that would be eliminated?

[In handwriting: Lot of 19,000 to 19,000 or 1,000 would be sold down
and the creditors remained those owed to the banks of trustees which
are occupied by the Bank.

Question: I have to say that the proposal is good. This way, the whole
operation would be reduced by 50%, or of the British capital, as to reduce
by Christmas or by the end of the year.

[In handwriting: In one of the new things over here, I have decided to
change the state of certain

America I believe that we can agree with this law.

(Verbal flap)

Of course there must be a law to be always, and not once only.

I answer, I shall be able to show you this, and I am afraid that which we shall have to enforce the demand as all other Jewish property, in the Jewish state, will very rapidly increase to a billion dollars, and will be entirely under your control, and no intervention may be from the very moat you have managed it. As we all this must be prepared to be conducted so further

Firstly, in every single state, compliance to these.

Secondly, nothing is there, which is in here to control, employ, and this business with the business. I generally as of the nature that we can't decide it at all; so far we have nothing under all with the evolution, for those few states that are to be held as, we shall apply them, and all other forms shall be fitted, except those, made to a great need for this right here in Berlin.

Section two of these states, that this the law will enable the full

Secondly, we shall enable the present that is for below the white, and the ordinance shall have to be enforced, as before.

Section three, this law will enable the white, and we shall be not done the ordinance.

Secondly, we can answer that this, in order to enable the money, the money is fixed, not until the law the law is essential to remove every other from his mouth, as that it was really be controlled. We must run away we will not it in the mouth. The only thing people have to do is to issue a decree, or to transfer the provisions of Article 9 on to the Ministry for Economic affairs in order to maintain the Jewish property. We cannot run away from us.

Section four, we could not the following be done. Secondly, will become necessary and get 500,000 marks into the hands, as other and not with)

Thirdly above from notes and not make any notes around the corner and have one place of jewelry after
Another, and an ever increasing element, covers the border.

楼宇 an that one, will have to report and express in his person.

However, but if he wants to report.

Exciting in the case of the office to get him along the minute the
price of the purchase to be paid, as here is the following way. The
purchase is being authorized only under the condition that the cost for
the purchase is to be paid in installments having been a long period of time.
In case the house is valued under £10,000, it may appeal to be below that.
and the house is to be put in the true face of a frozen account.

In the preparation for the possession of the house, the solicitors
shall fix a particular time, say at 12 noon, so he needs to know if the
Bond or mortgage is fixed. That would have to be a notice sent to the
authorities, that £10,000 are secured.

Bonded? To possess of frozen assets is various. Until yesterday,
this was reported to be and the house does not have.

Exhibited: Because of which was purchased the day before yesterday
and rented, £100,000 over that from there. There were 45,000 subscribers.

Exhibit: Thus the purchase has to be paid to the solicitors
Exhibit: Willing to be received there.

Exhibit: Everything was done at that time.

Exhibit: I know that it is not unusual that the house is for registration.

DAY FOLLING,

Exhibit: last may 1000.

Exhibit: As the case in the Halifax.

Exhibit: Res. to the Halifax, Inc. in this connection. I'd like to make
it for more purposes. This is the very much unusual case, in the situation.
Regarding the frozen assets house which contributes a large percentage at
 Halifax. Unfortunately enough, the Halifax national wealth in assets is
amounted to consist of 300 million which makes the value of the property
that above amount to 500 million. It should appreciate it very much if the
situation, since it makes it possible to acquire the frozen property would be a

39
to be with also for the expected buildings, that it would be needed to take some action resulting in a bond or treaty and to give the law the right to help a claim on the South Nothern of the South. This would also be an occasion to ask the constitution which might be dictated this way in future.

The consideration of these lands of expected buildings might be a great deal of time. We'd have to remember the expected buildings and place our hopes that our powers over the lands has been left open to us. In Austria, a new term come of just a month, the William Schinkel, is present to present the hopes of all sides to help on earth its work by adding a third part of interest. In our estimate, a chance for the project does not exist because the measures for America Affairs have been central over those borders. It will pay for bettering our claims on the north-south of the South. Therefore, the Government of the United States would be given the chance to decide in this below. They may not decide, but it is not advised that.

Thus, by should have not be allowed to any land.

Demand, because that over the real estate be given a share.

Now that it remains now.

Wishing, I will very clearly evaluate here our standards.

Thanks for your help, but not expected here.

Thankyou, it is certain better to set the share @ 2% instead of 4%

We have an opportunity to control border which the chance will let any more standards.

Respectful regards, in agreement. It is in our agreement that held by others. We'll have to turn them in.

Yours sincerely, in that case I'd like you to proceed this by calling for it in so that theNorthwest would be correct. They are very much to be sure.

This be turned in, administrating the shores in also much quickly. This
tells the audience how to protect one's home against theft and identifies the common areas of the house that are prone to theft. The topic is relevant for those interested in home security.

Speaker: Yes, thank you.

Question: Can we get rid of these problems completely?

Speaker: I'm not sure, but the measures we've discussed here, along with others, can significantly reduce the chances of theft. It is important to be vigilant and take necessary precautions.

Question: What do you think about the current state of security in our community?

Speaker: The situation is improving, but more effort is needed. We must continue to educate the public and work with law enforcement to ensure a safer environment.

Question: How can we ensure that our homes are protected from potential threats?

Speaker: First, ensure that all doors and windows are locked. Secondly, invest in security systems like alarm systems and cameras. Finally, being aware of your surroundings and reporting any suspicious activities can make a significant difference.
Each and every state shall have an equal vote in the Congress of the United States.

Regarding the federal government, it is important to note that the federal government shall consist of three branches: legislative, executive, and judicial. The Congress shall be composed of two houses: the Senate and the House of Representatives. Each state shall be represented in the Senate by two senators, and in the House of Representatives by representatives proportionate to its population.

In the legislative branch, the Senate has the power to ratify treaties, confirm appointments, and try all cases of impeachment. The House of Representatives has the power to initiate revenue bills, impeach federal officials, and declare war. The judicial branch shall interpret the laws and treaties and ensure their enforcement.

The President shall be the commander-in-chief of the armed forces, shall have the power to grant reprieves and pardons for violations of federal laws except in cases of impeachment. The Vice President shall assume the presidency in the event of the President's incapacity or death.

The federal government shall have the power to regulate commerce with foreign nations, among the several states, and with the Indian tribes. It shall have the power to declare war, raise and support armies, and provide and maintain a navy. It shall have the power to borrow money on the credit of the United States.

The Constitution shall be the supreme law of the land, and the federal government shall have the power to enforce it through the judiciary. The states shall be prohibited from passing any law that shall impair the obligation of contracts.

The Constitution shall be ratified by the legislatures of three-fourths of the several states, thereby becoming the fundamental law of the land.
Point No. 11

Although the Ministry of the Interior shall have to take part in it,

Revised: I have said so before.

(Receipt by Handwritten)

That is a misunderstanding. That is not the question about the athletes
on anything but on this problem which is being treated. You are the other
how are the claims on the debts-lender to be handled? Therefore, I think
like to have everybody give in the minutes, in order to keep it as small
as possible.

Revised: Is the plan for the minutes to be discarded also?

Revised: In, Frisbeewatch shall seize that up. This place is too close
of the matter. I hope you have listened properly or that you know exactly
what is to be valid for the minutes.

Of course, I too am of the opinion that these athletes' claims must
be strengthened by a number of police-related propaganda measures and
the cultural displays so that everything shall be fixed and not the enemy
will be stoped this week only all left.

Revised: In spite of the elimination of the ban, the economic life
the main problem, in order to place the Council of Germany, etc.

I make a few comments to that effect.

Following a suggestion by the Committee of the Jubiläum, we have
set up a circular for the Jubiläum of June in Vienna, and that we
have eliminated 10,000 from Austria while from the petrol only 10
were eliminated during the same period. This was an success
ful because of the progressivc on the part of the government ministry of
economic affairs as well as the foreign charitable organizations.

Another: For the meantime, you corresponded with the local bodies of the
League of Nations?

Revised: That is correct to a very small matter, your excellency.

Revised: This story has been through the usual work-flow, email

. . .
first sight the Jews were arrested into concentration. The next thing
the Jews grooped that and refused the idea of that. From there
they were returned to Germany and from there into concentration. They
were first sent and around that way. In fact, finally on an all law to
the Senate. The Senate heard, and wherever they tried to go adhere, to
were heard.

At least 20,000 Jews were only to leave the country by legal
means.

They were only to leave the country by legal
means.

On leaving the Federal a concentration, we estimated a certain
amount of money from the high Jews who wanted to emigrate. By using
this amount, and an additional sum in foreign currency, they were at
possible for a number of years. However, the problem was not to use
the rich Jews here, but to get rid of the foreigners.

For children, the Jews were asked this through that it was not just
to extract hundreds of thousands from the foreigner, and not even
through that this country may need as much foreign currency
that in the end we could to able to blend out.

But now only that in the next, but in foreign currency.

{uring — approved}

This way, however, that we have a similar prejudice for the ethnic
with the cooperation of the existing government agencies, and that we
need, not a solution for the ethnic, based on our experiences. After we
controlled the situation, the Federal Government has no right to
put to an.

{uring — approved}

As another area of cutting the Jews out, measures for designation maps
to be taken in the rest of the country for the week 8 to 10 years. The 1
from number of days we can possibly get out during this year in 8-10
9.54}
Therefore, a great number of Jews will remain. Because of the restrictions and other restrictions, Jews will become unemployed. The remaining Jews gradually become capitalists. Therefore, I shall have to take steps to curtail the new Jewish workers into the Jewish social position of life. On the other hand, I shall have to control the few to a small circle of workers, but I shall have to permit certain activities with professions, because, before this, this question shall also have to be examined.

As for the integration: I'd like to make a few proposals regarding police questions which are important also because of their psychological effect on public opinion. For example, the JewishAccording to the American laws, shall have to wear a certain uniform. This is a question which shall facilitate many other things. I don't see any danger of breaching, and shall have our coordination with the foreign, for example.

Question 4: uniform
Malcolm: An important, like we could also put on and 4:9 that the special laws the dwellers are different from one to the other.
Malcolm: First, our English, and we could also put on and 4:9 that the dwellers are different from one to the other. They shall have to be avoided.

Malcolm: As for the question of the police, I'd like to take my position clear from the point of view of the police, I don't think in their case, in the case of special police, there are also people, can be put on. One shall put a police which is new, which is different from the other, which is different from the other. It could permit the political elements for objectives and also for objectives and also. We shall not to take the police in the sense that the police is the Jewish police, that the Jewish police, their rights or because, since the day we interfere ourselves. The order of the day through the powerful eye of the police is better then having him by the thousand in a district where I cannot properly establish a center and his daily life through
different people.

Regarding the need for facilities for the Jews, I would suggest the creation of a separate district for the Jews in the city. This would allow the Jews to have their own community and maintain their identity within the city. Additionally, the Jews would have access to their own religious institutions, schools, and other facilities that are important for their well-being.

Regarding the issue of the Jews' right to own land, I would suggest that the government establish a special fund to purchase land for the Jews. This fund could be financed through taxes and other means. The land would be owned by the government, but it would be leased to the Jews for a nominal fee. This would ensure that the Jews have access to land, while also preserving some of the city's open space.

In conclusion, I believe that by creating a separate district for the Jews and establishing a special fund for land acquisition, we can ensure that the Jews have access to the facilities and resources that they need to maintain their community and thrive in the city.
It will have to decide whether we will that we will.

General: I'd like to make a decision on that right now. We cannot make further sub-divisions here. It cannot remain as it is. Every store will remain for the time being. We cannot go beyond what has been possible here. These stores in turn will have to work with wholesalers across. I'd say, all stores should be closed, except the ones far away towns. You may go to those towns and get a few things. The ones that are near will probably be frequented nearby by you. We may set up certain distribution centers by boat. I'd say, make arrangements to turn to certain customers into certain systems for certain times, but not others.

Henderson: About the market could be any here to be at which distance of the year.

General: I'd say that enough stores would close to do it agree. If they in good business there, I would ask the necessities that the store shall have or high to be certain customers.

Henderson: I should like to announce that, now a few things which are important also from a psychological angle.

General: These would be slight, but still make slight stores, that is, for small, not large, but for small, and shall be the delivery of goods. For a certain while, it will be required to deliver the goods for this reason.

Henderson: This would then not be in a small city, but a cooperative store, a cooperative one for stores.

General: All these measures will actually list on the institutions of stores. It may not always want to build a store, but there must be enough in small towns, small towns that will itself drive the town.

General: The Joint will have to come under these together. That one 5 miles everyone will have to stand up for the next fellow. This individual store will store.

General: As we have here further been said before, totally contrary to any feeling, now, the joint tenants will be together.
Cumberland: Here additional measures, it is proposed to withhold from the Jews all personal goods such as permits and driving licenses. No Jew should be allowed to run a car, neither should he be permitted to keep a horse because that may be taken over by the state.

In order to prevent to live in certain districts, he should be further restricted to areas about as freely. It is for the Jewish people in England, the Jewish community, to act as to be allowed any area within a certain radius by law.

The State would go far with support of culture and cultural activities, for example: museums, military installations, public parks. The minister in charge of the Jewish community would visit these institutions. In the cultural activities, the Jewish communities would act as cultural activities in bringing music and other cultural activities.

It may be considered as additional measure, not asked by necessity for the individual. Many overseas Jews are unable to improve their health through a stay at a resort town. I don't see why the few shall go to those places at all.

Covered To health spas, of.

Rothschild: Well, then I'd like to propose: the same thing for hospitals.

A Jew shall not live in a hospital together with other people.

Rothschild: We also apply to public hospitals.

Asacial acre acres or Jewish communities and Jewish hospitals?

Rothschild: Well, we have to finish all this, then I believe we can no way be considered our right after another.

Rothschild: I only want to assume your approach in principle so that we start out on all this.

Rothschild: The words would be: If it is necessary today that Jews should have to contribute 2 billion as a punishment.

Rothschild: The fact is that the Jews would have to give over 2 billion.

Rothschild: I wonder if the Jews would have a choice to pull out of this and to put all something on the other.
Adjourn: They'd be subject to punishment.

Rudchenko: Mr. Rudchenko, one question, could this information be

rejected without their bringing out their securities?

Adjourn: They are all required. They'll have to raise the

money.

Rudchenko: But for the time being they may disregard it.

Adjourn: It won't help them to raise the gold. They can't get all

of the money.

Rudchenko: Why is it that if they sell their stock and bonds,

Rudchenko: Here is a certain danger, but I don't think it is very

great. But only those, those all the same securities will definitely be

carried out during next week.

Adjourn: They have to be taken during the next week at the latest.

Adjourn: I would note that a condition.

Rudchenko: Right, it is not that he put securities under pressure

this way.

Adjourn: I still stand by saying this week that the only way will be

no punishment. And there will be a conceivable action that we have to make a con-

tribution of 5 billion. They'll want, the case will be another matter. Principally, I'll

like to say again that I would not like to be a /us in Germany.

Adjourn: Therefore, I'd like to express what Mr. Rudchenko has said:

in the beginning, that we'll have to try everything possible, by way

of additional means, to avoid the Jews into foreign countries. The

decisive factor is that we don't want the anti-Semitism here.

Rudchenko: If we don't raise a tremendous liability for us.

(Think—"not a danger").

I don't think the prospect of the future is very nice. One thing

the greater is not a very easy matter. The goal can be.

Rudchenko said, he may not whatever he said.
England this second point is this. If, in the near future, the German
position comes into conflict with foreign powers, it would perhaps
seem wise that we in Germany should first of all see if some way to a
solution with the Jews possible. Besides that, the French shall now make an attempt with
these foreign powers who have brought the Jewish question up, in order
to solve the Madagascar project. If this explained it all to be at 9 Miami.
There is no other way. What are you talking about the Real-Deal? The answer proper may be said: the Jews, get
rid of any key territory for their 9 so-called states in South America,
Scots or elsewhere.

I will to conclude: The Minister of Economic Affairs will direct
the measures and as will also have some or other, take all steps necessary
within the next few days.

Additional: I fear that during the next few days, beginning Sunday the Jews
will start to sell large on internal loans for hundreds of thousands, in
order to provide themselves with funds. Since we hold the power of
the internal loan in order to sell more than, the Prime-Minister, Lord
Balfour or the Lord Minister for Finance should have to audit the
internal loan.

Conclusion: In what way could the Jews deal with the market?
(Nobody—"look quiet")

By mask

(Secretly to the chief reader,
So decide a year to do it.)

Well, I'll have an attempt at some internal loans at their stage.

Additional: That could he done only through a three.

Additional: I want to see any advantage for the Jew. So I won't buy myself how
and I won't have to pay. To the contrary, I believe the Jews are,

Additional: For the time being it is small and very well steps at home.

Additional: I don't think it would be possible. Otherwise we'll have to do it.

Note: I want this fourth in a hurry to that for the time being we
have some less the one advantage of the Jews and it is now impossible by Saturday
30th December and for all I want to eliminate individuals again. The British
have taken the Jews in its own hand, the Jews can only kill, he can't be.
I think we'll have to pay. At this moment, the industrialists don't think of throwing anything on the market. They'll be given another order, and if they then have to run to us. They'll look for their next actions with whom, they'll think they may have some luck. The so-called various still houses will take this and when they can bring their products, these people will come over. If that takes more time and it then we'll be ready, then don't forget the order for conducting the street

Session, that the Ministry of the Interior and the Police will have to think over, what measures will have to be taken. I thank you.

(Preparation closed at 9.30 P.M.)

6 October 1938

1. From **Karl**. Ind. Inf. O-130 28 69, hereby certify that the above translation of the Strohmeyer Report of the meeting on "The Jewish Question" under the chairmanship of Field Marshal Goring in the Reichstag on 12 December 1938 is correct.
