The document mentions the possibility of instability and accordingly lays out the obligation to solve the Jordan question in the

1. To lay the foundations for this land in the peace treaty and to carry the same into effect by individual negotiations with the countries in the area that are affected by the peace treaty.

2. To secure to the six countries the territories necessary for the settlement of the problem and to establish the conditions for the collaboration of the six countries on this question.

3. To determine the position of the six countries the area of the land and the areas of their settlements.

4. To preliminary work:

1) establishment of the plan and the areas of the land and the areas of the six countries and the coordination of the same with the plan of the High Federal Commission, Part of this is also:

2) the cultivation of a survey on factual basis data which are to be found as the individual countries (number of the dead in the six countries) determination of their property by an international body.

3) negotiations as to these questions with Italy, our friend.

The Second 2 III has already instructed the High Federal Commission to carry on rapid and systematic work for the solution of this problem immediately.

The talks with the six countries of the High Federal Commission with the Ministry of the Interior, and the six countries of the Jordan government in the second half of the second half of the Second 2 III have already started for the solution of the Jordan question.
The terms under which France undertook to assist Turkey to set the State of Dodecanese free, as well as the settlement of the Jewish question, will be put into effect before the end of the year, at a cost of 2,000,000 French francs. The islands are to be evacuated and occupied by a Franco-Greek force.

The island of Rhodes, which has been declared a naval base, will be occupied by a French force. The works of naval strategy, as well as the harbour of Alexandria, will be improved, and there will be a possibility for the further expansion of these naval bases to the surrounding seas.

Apart from these naval bases, newly parts of the country which are suitable for establishing air bases are cut off from the territory of the Jews. The part of the island that is not required for military reasons is put under the administration of a French Governor. The islands are to be handed over to the administration of the Red Cross Society. Other than the Jews, all other countries in the territory; their own areas, their own cities, their own ports and railroads, etc., are managed as joint ventures.

Cautions for the value of the islands. The islands being very valuable, one must also take care, as far as possible, for this purpose to an expenditure which may be needed for the purchase of the entire island, or for the purchase of a part of it. Therefore, for the reconstruction of the island, they will receive at their disposal the rights from this source.

As regards the Jews, they are to be granted, on the basis of the rules already made, the right of residence. All Jews who have settled on Rhodes will be entitled to a share in the ownership of the individual European properties, effective from the time of settlement. Indeed, they become members of the national aristocracy.
This regulation requires the closure that the Jews establish a Jewish state of their own in Poland in order to seek their own safety and the security of the world. Besides this, the Jews must undertake to contribute to a state for the future good conduct of their racial currents in Russia. The generally known to the Jews by now to provide the material, economic, administrative and political autonomy, can be exploited from the point of view of propaganda. It can be emphasized in this respect that our German sense of responsibility towards the world requires to offer immediately the present of an independent state to a race which has no national independence for thousands of years; national independence must of necessity stand the trial of history.

Berlin, 9 May 1939
