Today's departure of an Inter-Departmental Board
for the Revaluation of Jewish Property in Europe.

The main thought in, as to say in one attempt to replace the
Jewish influence in economic matters in Europe by the Jewish in-
fluence, without creating interference in the economic structure
of the individual countries by the closing down of big Jewish firms.
We do not think that this would be advantageous to the new bank
which would American as trustee, and by and by, if the necessary
arrangements were realized and after the costs of the reestalment
section which had been advanced by the bank had been paid, would be
handed over to the trust treasury as advances against the values
which the Jews received in Böhmen.

In addition the bank would administer as trustee the sells,
based on the Bank of Böhmen. Also by these things can be acquired and are intended to be used for the
setting up the Jews. In the sense of the secondary section it
would be only by these values over to the Jews.

The Jewish property valued by the bank would not be sufficient
to pay these values in such. The bank would have to hold the rest
of the payments from the Jews and would currently have to hand them
over to the Jewish treasury. The Jewish property is already used, as
this has been done so far, be seized by the offices of the Jewish
Committee of the Jewish State Security office; these offices
already possess the required experience. From these offices the
occupation would be handed on to the bank.

For the setting of the foreign values a similar organization
would have to be provided for in the State Committee which are to be
connected with the individual Jews and concludes about the regulation
of the Jewish matter.

1
The draft would have to advance the necessary money for the expense of the reinstallation action if the Reichskaufmanns are agreed to.

The individual families would then receive a greater amount of portable baggage only. For the rest he reserves his claim to be settled by the Jewish community "Selbsthilfe".

The above named settlement committees could be used as examples for the providing of gold in the case in Beelitz-Heilstätten. A kind of security association could be founded for providing the Jews with the necessary equipment and for the utilization of the Jewish products in Beelitz-Heilstätten, so that the Jews could have no commercial contact with the outside world. Only the denounced authorized to buy the products would form the association, which also would handle the sale into the Berlin racial sanctuary or to certain countries.
