LET US TELL THE ANGELA.

AGAINST THE MURDERERS-DOCTORS— by Dr. Mark Ekonkayi

President of the Jewish Medical
Association of Palestine.

To the Chairman and honourable Assembly,

The medical science which for generations the very
symbol of human love, has been violated by the cruel crimes
committed by the cruel criminal doctors. The letters have
seized the misdeeds of humanity towards the Corporation who had
the sacred mission to help the sick in his suffering.

The Nuremberg proceedings in general and the proceedings
of the 22 doctors have partially revealed to the world the med-
cial crimes committed by the German doctors under the Nazi
system and this in the concentration camps such as Auschwitz,
Mauthausen, Belzec, Treblinka, Auschwitz, Natzweiler.

The World is still ignorant of treatments that were inf-
stincted in nearly one thousand concentration camps in Poland,
in the innumerable ghettos and extermination camps in Lithuania,
Lettonia, Estland, Lithuania, White Russia, Hungary and other
occupied countries where hand in hand with the Gestapo hundreds
of German doctors have not only in theory but in practice gone
their help for the extermination of millions of Belgians, French,
Dutch, Jews, Norwegians, Greeks, Hungarians, Polish, Russians,
Iniguana and others.

Generations of doctors who have during centuries kept the
sacred oath made for the observance of the medical moral are
posing the question of such crimes.

Must be considered as criminal all the criminal doctors who
have taken part in the selection for "death" in the camps
and who have personally decided the death of human beings
going to their own, political views or their non-German na-
tionality.

Criminals are all the criminal doctors who have personally
taken part in the extermination in the ghettos.

Those who have collaborated in the creation of gas cham-
cers where more than 10 millions of human beings of all national-
ities, of all races have met with death.

Criminals are those who have decided the death of hundreds
and thousands of people, sick and healthy.

Also those who have practiced experiments on human beings
and this without their consent or against their wishes ex-
perimenting injections in cold-water and forcing them to drink
water for weeks as well as keeping them in a pressure room or
sustaining them in the space.

Criminals are also those who have carelessly contaminated
the poison by means of injecting the symbol microbes as well
as that of tetanus etc.

Those who have abhorred the principles of medical theories
and which they have made the basis of the precept of the
education.

Criminals are those who have helped to the manufacture
of soap made with human fat from the victims of the
cremating furnaces.
Also those who have helped to the operations called "germanic sterilization" or "germanic mass sterilization" or the "mass sterlization of germans" were present to witness the horrors of the kampf for the extermination of the Jewish race.

For those who have practiced without the consent of human beings and against their wish the chemical, radiological, and surgical sterilisation.

The World's Association of Doctors must have the courage to protest right through the depth of medical ethics and find the way to kill such abominations to avoid such abominations.

I have before you accounts for what these abominations are not only written stories, but what has escaped and of which the body has suffered from these crimes, one of the victims who recorded the witness of these medical crimes committed by the German doctors under his very eyes and this is in the ghettos of Vilna and in the extermination camps where the Waffen SS and the medical愚蠢 in Germany when she was a prisoner, during four years (from September 4th 1942 to April 10th 1946).

As a witness to the fact that in October 1942, the German doctors took to bear death all the wounded patients from the Vilna Hospitals.

Also that the German doctors ordered to 1000 Jewish children from the ghetto to Vilna to present themselves clipped and well dressed for a medical inspection. The children were asked alive and the skins from their faces were transferred on the German soldiers. After that the children disappeared.

I have seen in the Volovac's camp near Novo in the Łódź ghettos, German doctors covering these children and the doctors telling the children that they would be thrown alive into the cars and shipped away.

I have been a witness to the fact that the German doctors at the Biebrza-Bialystok in December 1944 to 1945, together with the SS SS and all other prisoners, were also killed in normal operations all the Ghettos children.

I also can say that I have seen the same doctors were told to leave all the Jewish children underfed and not medicated as they were ordered to take part in such criminal action.

I stop here as long list of doctors that I have seen and had to bear would be too long.

For generations in this place of the medical community you can read the following words: "In the course of years, the doctors have transformed the area into a place of entertainment."

The World's Association of Doctors which is a Federation of the various organizations and not individuals must also an attitude towards the collectivity of today's doctors in Germany, this although there must be a small number of genuine doctors that have suffered from the humiliation of the human and medical word in our country.

More than two years have already elapsed since the fall of Hitler. Has the medical World heard the german medical community express the feelings and a great sense of guilt for the crimes committed since 1933? As well as the sincere wish to shape it for the future.
Doctors from all countries!

You cannot remain indifferent before the moral results of such drama and which weigh on the conscience of the entire humanity!

The image of the millions of innocent victims from all nations should stand before us and amongst them thousands of doctors who have perished from the hands of their criminal colleagues; such images are shocking and are awaiting the vigilance science and against the doctors' condemnations.

We must keep in mind the remembrance of all the doctors who have resisted, either as mobilized in the allied armies or as voluntary partisans, either when giving their life to the sanitary and medical resistance in the ghettos and in the concentration camps. We must exact a commitment to the remembrance of the 'Resistant and Martyr' doctors.

Can the victim and his murderer stand beside one another in an Association? The victim - and the man who was ready to exterminate him? And - the 'we all'

All dead and all crimes!

Can the generation of German criminal doctors, such generation who has given its sanction, its blessing to crime and who has given its sanction to a collective to judge the World's Association of Doctors, on the walls of which are written the words of Jesus: "I am not asking you which are your opinions nor your truth but what are your sufferings?"

SHE CANNOT DO SO.

Facing the great anxiety of the danger of penetration of an immoral and destructive science - The World's Medical Corporation must devote all its efforts towards the reinforcement of moral sciences in the formation of all doctors and in the conscience of their sacred profession. We must protest against the universal infection against the immoral and prostituted science.

From this World's tribunal let us throw the masks against the murderers-doctors!

Let us only have the eternal hosts of the medical profession.

Man thou are my brother.

Dr. Mark Bercovitch
(Delegation of the Jewish Medical Association of Palestine)
and watch execution.
