LET US TELL THE ANGELA
AGAINST THE MURDERERS—DOCTORS—by Dr. Mark DeRosa

Reported by the Jewish Medical Association of Palestine.

To the Chairman and Honorable Assembly,

The medical science which has for generations been the symbol of human love, has been violated by the moral crimes committed by the German doctors. The letters have added the faith of humanity towards the Corporation who had the sacred mission to help the sick in his sufferings.

The Nuremberg proceedings in general and the proceedings of the 22 doctors have partially revealed to the world the medical crimes committed by the German doctors under the Nazi system and this in the concentration camps such as Buchenwald, Mauthausen, Dachau, Straffel, Auschwitz, Treblinka.

The World is still ignorant of treatments that were inflicted in nearly one thousand concentration camps in Poland, in the inhumane ghettos, and extermination camps in Lithuania, Latvia, Estonia, Ukraine, White Russia, Hungary and other occupied countries where hundreds of German doctors have not only in theory, but in practice, too, their help for the extermination of millions of Belgians, French, Dutch, Jews, Norwegians, Greeks, Hungarians, Poles, Russians, Tatars and others.

Generations of doctors who have during centuries kept the sacred oath made for the observance of the medical moral are part of the Agony of such crimes.

Must be considered as criminal, all the German doctors who have taken part in the selection for “death” in the camps and who have personally decided on the death of human beings, being to their credo, political views or their non-German nationality.

Criminal are all the German doctors who have personally taken part in the extermination in the ghettos—

Those who have collaborated in the creation of gas chambers where more than 10 million of human beings of all nationalities, of all races have met their death.

Criminal are those who have decided the death of hundreds and thousands of people, sick and healthy.

Those who have practiced experiment on human beings and this without their consent or against their wishes, exposing innocent in cold water and forcing them to drink with water the wounds as well as keeping them in a pressure room or maintained in the space.

Criminal are also those who have willingly continued the prisoners by means of injecting the psychical microbes as well as that of tetanus etc.

Those who have shattered the principles of medical theories and which they have made the basis of the precept of the education.

Criminal are those who have helped to the manufacture of soap made with human fat obtained from the victims of the cremating furnaces.

19/04/1947
Also those who have helped to the operations called "Barbarossa" [Operation Barbarossa] on many of the 18 million per forced from the island of living children.

Those who have practiced without the consent of human beings and against their wishes the chemical, radiological, and surgical sterilization.

The World's Association of Doctors must have the courage to protest against the depths of medical crime and find the way to fill such abysses as to avoid new victims.

You have heard the appeals for those crimes are not only written stories, but that they have been and of which the body has suffered from those crimes, one of the victims of those crimes and still in the ghettos of Vilna and in the ovens of concentration camps (Vilnius, Kovno, Lublin, Warsaw, Lodz, Dachau, Buchenwald, Dora-Mittel, Auschwitz, etc.) where the Nazis were prisoners.

I am a witness to the fact that in October 1942, the German doctors took to their death all the through patients from the Vilnius hospitals.

Also, that the German doctors ordered to the Jewish children from the hospital of Vilnius to present themselves clean and well dressed as a political recognition. The children were admitted alive and the skins from their faces were transferred on the German soldiers. After that the children disappear.

I have been in the Vilnius camp near Minsk in thelik's German doctors concerning how the prisoners should be thrown into pits filled with water and were slowly died through the process of cold.

I have been a witness to the fact that the German doctor von Patterson has himself in December 1942, to the medicine for 300 prisoners, sick or well, and to kill them from disease, all the others.

I can also say that the same doctor von Patterson ordered to have all the Jewish doctors dismissed and be transported as they were ordered to take part in such criminal activities.

I can add here as the list of doctors that I have seen and had to bear would be too long.

For generations in the face of the National Germans you can read the following words: Doctors have nothing to do with the doctors, they are members of the nation.

The World's Association of Doctors which is a federation of the organizations and not individuals must make an ethical protest towards the acts of the century's doctors in Germany, and this although there may be a small number of German doctors that have suffered from the humiliation of the non-German medical world in that country.

More than two years have already passed since the fall of Hitler. Has the medical World heard the German medical community express its outrage at the crimes committed since 1933? As well as the sincere wish to make amends for some.
Doctors from all countries!

You cannot remain indifferent before the moral results of such crimes and which weights on the conscience of all humanity.

The image of the millions of innocent victims from all nations should stand before us and amongst them thousands of doctors who have perished from the hands of their criminal colleagues; such images are alarming and are awaiting the witnesses of the world to unite against the doctors' destruction.

We must not forget the memory of all the doctors who have resisted, either as mobilized in the Allied armies or as volunteer partisans, either when giving their lives to the struggle for freedom or by medical resistance in the ghettos and in the concentration camps. We must erect a monument to the memory of the 'Resistant and Martyr' doctors.

Can the victim and his murderer take place in an Association? The victim - and the man who was ready to exterminate him? And - the two are all equal on this earth and on all roads!

Can the generation of German criminal doctors, each generation who has given its sanction, its blessing to crime, find a place in the World's Association of Doctors, on the walls of which are written the words of Rabbi: 'I am not asking you which are your opinions nor your faith but what are your sufferings?'

She cannot do so.

Feeling the great anxiety of the danger of penetration of an insane and destructive science - The World's Medical Corporation must devote all its efforts towards the reinforcement of moral actions in the formation of all doctors and in the conscience of their sacred profession.

We must proclaim the universal solidarity against the immoral and prostituted science.

From this World's tribunal let us throw the match into the hearts of the murdered-doctors!

Let us cry here now the eternal haunts of the medical reprobate.

Man thou are my brother.

Dr. M. Hessman
(Delegation of the Jewish Medical Association of Palestine)
Mr. and Mrs. Reigel

Kindly arrange for us, then hand over to Mr. Alperin and Mr. App.
and watch execution.
